Rahul Sharma
Full Stack Web Developer

Professional Summary

Accomplished Full Stack Web Developer skilled in the MERN stack, showcasing strong JavaScript expertise, team collaboration, and proactive problem-solving. Adept at employing Generative AI to innovate and swiftly adapting to new technologies for optimized performance. Committed to crafting scalable and efficient web applications with seamless integration.

Projects

Task Management APP   Live Demo Link   Github Repo Link

JavaScript   Git   HTML5   CSS3

Responsive Web Design

- Developed a comprehensive task management system using JavaScript, HTML5, and CSS3, focusing on user authentication and task management.
- Implemented interactive task creation and filtering options, allowing users to manage tasks efficiently.
- Designed graphical visualization features to provide a detailed view of task completion using various chart options.

Evolution of UI and UX   Live Demo Link   Github Repo Link

Git   HTML5   CSS3

- Collaborated with team members to design and develop UI/UX replicas for tech giants using HTML5 and CSS3.
- Created interactive elements to demonstrate the evolution of design trends over several decades.
- Integrated era-specific design elements to enhance user engagement and provide a historical visualization.
- Utilized Git for version control to manage collaborative development workflows and maintain code quality.
- Contributed to the enhancement of user experience while learning from historical design trends.

Experience

C.B. Machinery Solutions Pvt. Ltd. | Workshop Supervisor   June 2022 – April 2024

- Supervised daily operations of the workshop, effectively managing workflow and team performance to enhance efficiency.
- Oversaw maintenance and repair tasks for complex machinery, ensuring high standards of safety and functionality.
