SUMMARY

Full-Stack AI Engineer with hands-on experience designing and delivering production-ready web and mobile applications using React.js, Next.js, MERN stack architecture, and React Native. Experienced in building scalable product features and developing complex workflows, including a vendor-based cab booking platform with optimized UI/UX and robust validation systems. Implemented AI-driven semantic search using vector databases and Retrieval-Augmented Generation (RAG) to improve booking discovery and search relevance. Strong expertise in JavaScript, TypeScript, modern state management, and backend development using Node.js, Express, MongoDB, and MySQL. Skilled in building scalable frontend architectures with React and Next.js while integrating intelligent systems using vector databases, semantic search, and AI APIs. Passionate about developing high-performance, intelligent applications and leveraging full-stack and AI capabilities to build scalable, user-centric products in agile, product-driven environments.

PROFESSIONAL EXPERIENCE

The Return Journey

Jan 2025 - Jan 2026

Full Stack Developer

Pune

- Developed and maintained B2B and B2C web and mobile applications using React.js and React Native, serving internal teams and external vendors, improving platform responsiveness by ~30% and reducing UI load times through component optimization and efficient state management.
- Engineered core frontend modules including end-to-end booking workflows, Recent Searches, History tracking, and Razorpay payment integration (full and partial payments), increasing successful booking completion rate by ~25% and reducing manual booking intervention by ~40%.
- Designed and implemented a cab booking and vehicle onboarding system from scratch, handling booking lifecycle validations and vendor onboarding flows, improving booking accuracy by ~35% and reducing booking-related operational errors by ~30%.
- Integrated semantic search and vector-based retrieval (RAG) using Python and open-source embedding libraries, improving search relevance by ~40% and reducing average user search time by ~25% during tour discovery and booking workflows

PROJECTS

TRJ Cabs | <https://trjcabs.thereturnjourney.com>

The Return Journey

Pune

- White-label cab booking platform enabling vendors to book, manage, and customize vehicle rides
- White-labeled B2B travel platform enabling vendors to manage travel itineraries and bookings across global destinations, supporting scalable vendor operations.
- Developed core modules for itinerary creation, pricing configuration, vehicle onboarding, and end-to-end booking lifecycle management, along with auto-prefilled search using recent user activity to improve booking speed and user experience.
- Integrated AI-based itinerary validation that analyzes selected destinations, travel duration, and activity distribution to identify unrealistic travel plans and improve trip feasibility.

TRJ Partner B2B Website | <https://trjpartner.thereturnjourney.com>

The Return Journey

Pune

- White-labeled Platform for vendors to book, manage, share and customise itineraries
- Built a white-label B2B itinerary management platform for vendors with sharing and booking workflows.
- Improved vendor efficiency with recent search persistence, auto-filled inputs, and smart itinerary categorization using semantic search concepts.
- Enhanced usability through new discovery sections and streamlined UI/UX.

TECHNICAL SKILLS

- **Frontend & Mobile:** React, Nextjs, React Native, Tailwind CSS, Redux, Zustand, HTML, CSS
- **Backend:** Node.js, Express.js, MongoDB, MySQL, FastAPI
- **AI ML :** Python, Agentic AI, VectorDB, RAG, LangChain, LangGraph
- **Tools and Platforms:** Git, Jira, VS-Code, Vercel, Netlify

EDUCATION

Masai School, Bengaluru

May 2024 - Dec 2024

Full Stack Web Development

Bengaluru

Aryabhata Group of Colleges

May 2016 - Sep 2019

Diploma

Ajmer

CERTIFICATIONS

- Full Stack Web Development Certification
- National Skill Development Certification
